

ABSTRACT OF THE DISCLOSURE

The present invention pertains to a method, system and storage medium for providing a process view of at least one work item of a process, such as a process for accomplishing tasks of a business process. The method includes the steps of presenting a list view that provides the work item in a list format, selecting the work item from the list view; and providing the work item in the process view. The process view includes a graphical representation of the work item, and representations of relationship data of the work item relative to the process.
